

## Bacciottini Creasing & Folding Machines – Since 1983

Founded in 1983, Bacciottini Group is a leading company in engineering and manufacturing completely automated machines to perform creasing, folding, perforating, and punching functions. Bacciottini products are globally recognized and appreciated for quality, efficiency, long-life, and ease of use. 5,000 of these units have been installed world-wide, with many still in production 20 years later.

Quick and quality stepper motors are utilized, as opposed to belt and pulley systems, which are capable of achieving up to 14,000 sheets per hour.

Steel side frame construction for superior strength, minimal maintenance, and longer life.

1.125" wide, solid steel, upper tooling. Design assumes the highest quality Creasing, Perforating, and Folding

Separate high volume air and vacuum pump systems
